SUMMARY

Computer Science undergraduate specializing in full-stack development (MERN stack, Java) and cloud databases. Proven problem-solver with a portfolio of 400+ solved LeetCode problems demonstrating a strong command of complex Data Structures & Algorithms.

EXPERIENCE

Bill and Udhaar

Freelance Android Developer

May 2026 – Present

Remote

- Engineered a full-stack Java/Firebase ledger app, automating inventory tracking for 10+ local small businesses.
- Integrated Cloud Firestore for real-time offline synchronization and WorkManager to trigger instantaneous low-stock alerts.
- Built an automated PDF invoicing feature shared directly via WhatsApp, reducing client billing cycles by 15%.

Webcipher Technologies

Software Developer Intern

June 2026 – July 2026

Nashik, Maharashtra, India

- Developed the front-end architecture of a native Android application from scratch using Java and Android Studio.
- Prototyped 15+ interactive, user-centric mobile application UI wireframes within Figma prior to production.

Econnect12

UI/UX Designer & Developer

June 2024 – Jan 2025

Bhopal, MP

- Led UI/UX design for an academic platform, shipping 30+ high-fidelity screens and interactive prototypes using Figma.
- Pitched the product to regional school leadership, securing a pilot program implementation serving 150+ active students.

AI Club - VIT Bhopal

Team Member

June 2024 – Present

Bhopal, MP

- Organized "Code Jumanji," a QR-based coding hunt for 50+ competitors, achieving a 95% satisfaction metric.
- Mentored 2 junior club members weekly on agile software development practices and Java project engineering.

PROJECTS

Yelp Camp | MongoDB, Express.js, React.js, Node.js, EJS

- Built a full-stack MERN campground-sharing platform using EJS for high-performance server-side rendering.
- Architected 25+ RESTful API endpoints establishing full CRUD capabilities across User, Camp, and Review schemas while applying the MVC model for purposeful structuring of code.
- Integrated Passport.js authentication to secure user accounts and enforce strict resource-level authorization.

Shopping Application | Oracle APEX, PL/SQL, Oracle Cloud

- Authored an e-commerce platform with faceted search, dynamic cart state, and geolocation store mapping.
- Standardized PL/SQL backend triggers to automate backend order management and customer feedback loops.

Product Management System | Java, OOP, Data Persistence

- Designed a Java console system enforcing strict OOP inheritance, custom exceptions, and file-parsing interfaces.
- Implemented multi-locale internationalization engines alongside secure local file data persistence.

EDUCATION

Vellore Institute of Technology, Bhopal

Bachelor of Technology in Computer Science (CGPA: 8.97/10.0)

2023 – 2027

Bhopal, India

CERTIFICATIONS

Oracle Certified Professional: Java SE 17 Developer – Oracle

July 2025

Database Developer on Oracle Cloud (APEX) – Oracle

July 2025

The Web Developer Bootcamp – Udemy

Jan. 2025 – Apr. 2025

SKILLS

Languages : Java SE 17, Python, JavaScript, SQL, HTML5, CSS3, C++, Assembly Language (8086)

Frameworks & Libraries : React.js, Node.js, Express.js, EJS, Oracle APEX

Databases & Tools : MongoDB, MySQL, Oracle Cloud, Git, GitHub, Figma, Android Studio, AWS

Core Concepts : Data Structures & Algorithms, Object-Oriented Programming (OOP), Full-Stack Web Dev
